

Assignment #4: Design *Charrette*

Total Points: 50

char rette

/shuh-ret/

noun

: any collaborative session in which a group of designers drafts a solution to a design problem

I'd like you to redesign **a sample page** from a report about broadband Wi-Fi access in luxury hotels. Use the characteristics of effective information design discussed in class and in a recorded lecture. Before you begin, review those elements carefully; you'll be using **all** of them to redesign this page. You are **not** responsible for editing the text.

You will find a digital copy of the page in the Design *Charrette* module on Canvas. Download the page, redesign that document on screen, save a copy, and upload the first draft using the Turnitin link on Blackboard. That draft will then be peer-reviewed. Please **do not** include your name on the redesigned page.

Recommendations

Here are some recommendations that may help you complete this *charrette*:

- Review the six characteristics of information design we will discuss in class (included on PowerPoint).
- Review the Report Page Specifications section below.
- Make sure you understand where citations should appear in the final version (especially in captions)
- Be aware that the redesign will run between one to two pages.

Charrette Report Page Specifications

Length: No more than two pages

Margins: 1 inch all around

Line Space: Single

Justification: Ragged right

Paragraph Length: Five-line maximum:
"chunked," varied
